The first part of the paper is devoted to a discussion of the general principles of the theory of the structure of the atom. It is shown that the structure of the atom is determined by the laws of quantum mechanics, and that the laws of quantum mechanics are determined by the laws of the theory of the structure of the atom. This is a circular argument, but it is the only way to proceed.

1. The first part of the paper is devoted to a general
discussion of the principles of the theory of
the function of the mind. It is shown that the
mind is a complex system of organs, each of
which performs a specific function. The
functions of the mind are divided into three
classes: the functions of the intellect, the
functions of the emotions, and the functions
of the will. The intellect is the faculty
by which we perceive and understand the
world around us. The emotions are the
feelings which we experience in response
to the objects of our perception. The will
is the power by which we direct our
actions.
